Print the given string in a zigzag fashion. The input is going to be an array of string, with the second param being the no. of lines in which you have to arrange it.

Do note that you have to process these concurrently, not sequentially. (**Bonus**)

Input :
```
[
    ['JOBIFYISHIRING', 3],
    ['NEWYORKISALOVELYCITY', 5],
    ['HELLO', 6]
]
```

Example 1:

Input: s = "JOBIFYISHIRING", numRows = 3
Output: "JFHNOIYSIIGBIR"

Explanation:

```
J   F   H   N
O I Y S I I G
B   I   R
```

Example 2:

Input: s = "NEWYORKISALOVELYCITY", numRows = 4

Output: "NKVTERIOEIYWOSLLCYAY"

Explanation:

```
N     K         V         T
E   R I       O   E     I Y
W O     S   L       L C
Y           A           Y
```
